**Public Health Report
(continued)**

- Motion seeks to consolidate the three Departments to enhance collaboration and better integrate various health services, such as: mental health, substance abuse, etc.
- The Department should have more information within the next 60 days. Immediate details are currently unknown.
- Some background information on the 2006 DHS/DPH split:
 - The Breslow Report- examined DPH when it was under DHS, between 1972-2006 and supported the degradation of DPH due to both departments serving two different missions, as well as:
 - Funding streams between the two Departments
 - After an assessment/evaluation (conducted by LAC CEO), DPH became an independent Department
 - Since the split, DPH has done some great work
 - Ms. Brumfield passed out Board memo from August 2014 which highlights milestones accomplished under Dr. Fielding's leadership.
- *Vice-Chairperson Crawford asked if the consolidation was precipitated by the search for Dr. Fielding's replacement? Ms. Brumfield indicated that it is currently unknown.*
- Ms. Brumfield stressed the importance of the fact that DPH's work will still continue on regardless of the potential consolidation. She stated that individuals who work for DPH are passionate about public health and will ensure that the mission of the Department is carried out moving forward.

**COUNTY OF LOS ANGELES
PUBLIC HEALTH COMMISSION
JANUARY 8, 2015
MINUTES**

- Ms. Brumfield indicated that she would keep the Commission apprised of any further information about this issue.
- *Commissioner Crawford asked if there has been any discussion about how the potential consolidation may relate to the Public Health Commission. Ms. Brumfield indicated that there has not been a discussion at this time.*
- *Commissioner Dowling inquired about the timeframe of the motion. Ms. Brumfield stated that the Board motion indicated that January 13, 2015 is when it will be decided to approve the concept as well as instruct DHS to report back w/in 60 days with a proposed organizational structure.*

California Department of Public Health Review of Los Angeles County Health Facilities Inspection Division Update- provided by Terri Williams, Assistant Director of Environmental Health

- The Health Facilities Inspection Division (HFID) program was put under Ms. Williams' leadership last year to help maximize and enhance the program's effectiveness.
- The update included a letter that was sent to the State regarding HFID's strategic Workload Plan that was developed to clarify the amount of work that HFID staff will be able to complete, while ensuring quality assurance and protecting public health.
- Ms. Williams updated the Commission about a work plan that was created by DPH staff to strategically address HFID's workload moving forward. She explained how LA County receives 15% of

the State's budget allocated to Health Facilities, yet oversees 33% of the facilities Statewide, highlighting how severely under staffed and under resourced LA County remains. Therefore, in order to ensure that quality work is completed, DPH used the State's staffing model to create a plan that addresses the amount of quality work that staff will be able to complete due to the lack of resources. The determined amount of work that HFID staff is able to complete is 50%. Ms. Williams and Cindy Harding have shared this information with the State accordingly as well as meeting with respective Board offices to keep them apprised of the situation.

- The State, however, would like HFID to continue to complete mandated surveys, although HFID has expressed the lack of resources do not allow HFID to complete these surveys without compromising quality assurance.
- In a letter dated December 22, 2014, HFID sent the State (CDPH) notification that HFID will continue to follow the Work plan until written notification that instructs otherwise, is received from the State.
- In the meantime, HFID will continue to complete the work according to the Work Plan provided to the State, with the current staff levels. If HFID attempts to complete what the State wants, HFID feels that public health is being jeopardized.
- *Commissioner Crawford commended Ms. Williams for her hard work and leadership in improving HFID. Ms. Crawford also requested for Ms. Williams to let the Commission know how it can be supportive of HFID activities in the near future.*

Questions

- *Commissioner Shindy expressed concern about other companies in LA County becoming a similar problem. He asked how about how examine and address the issue before it becomes a problem the magnitude of Exide?*
 - *Mr. Bellomo stated that there is some assurance. He mentioned that there are various facilities in the State of California that are given temporary permits. Exide was the exception, since the permit was not issued properly by the State and has remained temporary status.*

- *Commissioner Dowling asked if any homes or schools in the areas have been evacuated?*
 - *Mr. Bellomo stated that no homes have been evacuated*
- *Commissioner Dowling also asked what is being done about the schools in the areas?*
 - *Mr. Bellomo stated that there are plans currently underway. DPH went out and replicated all of the sampling and determined that there are currently no emergency conditions. If any actionable levels are assessed, the situation will be dealt with immediately.*
 - *Mr. Bellomo stressed the fact that DPH would not hesitate to evacuate locations if a true emergency was determined. At this time, there is a sense of urgency to get the work fully done so that we can know how many homes are Priority one.*
 - *Mr. Bellomo also stressed the fact that DPH (Health Officer) to ensure that homeworkers are advised pending the cleanup, what measures they can take.*

- *Commissioner Bholat asked for more historical background regarding Exide—what City is it located what agency owns/operates it, etc.?*

|--------------------------------|--|--|
| | <ul style="list-style-type: none"> ▪ <i>Mr. Bellomo stated that Exide is located in the City of Vernon. The City possesses the land use approval/ability to regulate activities. Exide's functionality is a primarily a secondary smelter. Exide takes batteries (from the federal government, national defense, personal, commercial, entities, etc.) and melts them down, extracts them, and produces batteries under the name Exide batteries. As far as who/what agency owns Exide, Mr. Bellomo stated that the facility has a long history of being passed off to one owner to another.</i> ○ <i>Commissioner Bholat asked Dr. Cyrus Rangan what type of (long-term) impact would one expect to see from patients coming from the community ?</i> <ul style="list-style-type: none"> ▪ <i>Dr. Rangan stated that he would expect to see potential for lead exposure. To address this, testing of blood levels in young children and adults have been conducted. So far, all levels have shown to be within normal range. These results indicate that there is not an urgent issue at the moment, but this does not indicate that it will not become an urgent issue over time.</i> ○ <i>Commissioner Shindy asked if we can perhaps look at cancer registry data?</i> <ul style="list-style-type: none"> ▪ <i>Dr. Rangan stated that DPH has looked at cancer registry data at USC and the data does not suggest that Exide is responsible for more cancer in any other area.</i> ○ <i>Vice Chair Crawford thanked Mr. Bellomo and Dr. Rangan for an excellent, informative presentation.</i> | |
