IV. PUBLIC HEALTH REPORT	<p>Jonathan Freedman provided the Commission with a Public Health Report and discussed public health activities since the last report on April 12, 2012.</p> <p>2010-2011 Annual Report – L.A. County</p> <p>Mr. Freedman informed the Commission that at the next meeting he will discuss DPH's budget and organization, this annual report is a prelude to what he will discuss. The report is also available on DPH's website.</p> <p>Southern California Physician Magazine Article</p> <p>The feature article in the April 2012 issue of the Southern California Physician, the official magazine of the L.A. County Medical Association, highlights some of the work the Department of Public Health does in order to address a number of critical public health needs throughout the county. Specifically, the article includes the work of Project TRUST, RENEW LA, Choose Health LA, and the PLACE Program.</p>

<p>IV. PUBLIC HEALTH REPORT CONTINUED</p>	<p>National Governors Association Meeting on Health and Homeland Security</p> <p>The Department of Public Health (DPH) has been invited by the National Governors Association to participate in a conference in Washington, D.C. on April 26-27, 2012 regarding homeland security and fusion center efforts with local public health agencies. DPH staff who are involved in the Joint Regional Intelligence (JRIC) will attend. As you may know, DPH participates in the local JRIC, and DPH's efforts are viewed as a model nationally.</p> <p>Mr. Freedman indicated that DPH has about 20 staff who have security clearance with Homeland Security, this allows DPH staff public health information sharing with other public health organizations and homeland security advisors.</p> <p>Report on the Feasibility of Moving the Toxicology Lab From the Department of Agricultural Commissioner/Weights and Measures to the Department of Public Health</p> <p>On December 6, 2011, the Board directed the Chief Executive Officer (CEO) to report back within a month on the feasibility of moving the Environmental Toxicology Lab (ETL) from the Department of Agricultural Commissioner/Weights and Measures (ACWM) to the Department of Public Health (DPH).</p>

TOPIC	DISCUSSION/FINDINGS	RECOMMENDATION/ACTION/ FOLLOW-UP
IV. PUBLIC HEALTH REPORT CONTINUED	<p>The report basically discusses the pros and cons of combining both the laboratories.</p> <p>Given the complexities of the ETL and PHL, there is no apparent optimal organization alignment of the ETL in the county. As a result, DPH requested a three-month extension to July 10, 2012 for a more comprehensive analysis.</p>

V.ACDC PROGRAM CONTINUED	<p>Dr. Dassey also discussed the following:</p> <ul style="list-style-type: none"> • Electronic Disease Surveillance Systems • Automated Disease Surveillance Systems • Planning, Evaluation, and Response Section • Training and Response • Full-Scale Multi-Agency Bioterrorism Exercise on Board a Cargo Ship • Professional Training • Health Education Materials • Healthcare Provider Bioterrorism Education <p>Chairperson Bholat asked Dr. Dassey, when you measure your successes, how do you know you made a difference. Dr. Dassey indicated how we measure success is difficult. Our numbers are going down, and by bringing on electronic reporting, we are hearing about things we never knew before.</p>	<p>Commissioner Dowling asked if mad cow disease affects DPH. Dr. Dassey indicated one single cow was tested, and according to FDA, it did not go into the food supply, as a result, it doesn't have any impact at all on DPH. E. coli has substantially higher risk to DPH than mad cow disease.</p> <p>The Commission thanked Dr. Dassey for an excellent presentation.</p>
